Comedy "Making The Rounds"
Novelty "Broadway Knights"

Admission 30c and 10c
COMING
Lillian Harvey

"My Lips Betray"

COMING
Lillian Harvey

Tom Uphill, of Fernie, will represent the Blairmore Unit of the Mine Workers' Union of Canada at a big convention to be held in Toronto, supporting the movement against war and fascism.

In convention at Edmonton, Charles Trautman, of Calgary, was re-elected president of the Alberta Hotel Association, with J. S. Kirkham, of Lethbridge, as second vice-president, and R. E. Noble, of Edmonton, vice-president.

RAILWAYS OFFER WINTER EXCURSION FARES

Winnipeg, Man.—Following the practice of former years, numerous winter excursion fares will be authorized this year by the Canadian National and Canadian Pacific railways, according to an announcement made recently by Jos. B. Parker, secretary of the Canadian Passenger Association western lines. These low excursion fares will be effective to Eastern Canada and the Pacific Coast, as well as to certain points in the central United States, from stations in Ontario—Port Arthur, Armstrong and west—Manitoba, Saskatchewan and Alberta, and will bear no restrictions as to sleeping car accommodation.

Tickets to Eastern Canada will be on sale from December 1, 1934, to January 5, 1935, with a return limit of three months. For passengers going overseas, to the West Indies, Bermuda or on a world cruise, tickets will be on sale from November 15, and will be good for five months.

To the Pacific Coast and California, tickets will be on sale effective December 1, 1934, to February 28, 1935, and will be good for return until April 30, 1935.

To points in the central United States, tickets will be on sale from December 1, 1934, to January 5, 1935, with a three-month return limit.

The railways anticipate that the low fares, lengthy time limits and generous stopover privileges will prove very attractive to those who desire a vacation at a minimum cost.

CHAMPION GAMBLER

Who is the world's biggest gambler? We'll say the fatter. He gambles with the weather, with the soil, with grasshoppers, with army worms, with birds and a score of other plagues. Every spring he takes a chance—a desperate chance. If he wins, as he does occasionally, he comes off with a big stake. If he loses, which he does more frequently, he has a chance to try again. Happily he is a good loser, or the world would starve.

FILMS SHOW MOTOR CAR BUILDING, ETC.

Fully three hundred persons attended the talking moving picture demonstration of car building, etc., at the Lodge hall on Tuesday night, staged under the auspices of the Chrysler Corporation, of which Mr. C. Sartoris, of the Blairmore Motors, is local district agent.

The first picture brought one through the Chrysler exhibit at the Century-of-Progress Exposition at Chicago, showing in a simple manner just how a motor car is built. Here you could see a Plymouth car before it reaches the assembling plant, its 32,562 pieces being put together, the car painted and ready to drive away.

The second picture was called "Three a Minute," showing Chrysler, De-Soto and Plymouth automobiles going through production at the unbelievable rate of three per minute.

The third picture was a Dodge feature, showing its famous show-down plan. Here one could see automobiles put to tests far more rigid than anything they are put to on reaching the purchaser's hands.

The fourth picture had a real appeal. Barney Oldfield and Billy Arnold, famous dare devils of the dirt track, giving stunts on their proving grounds. It was truly a "believe it or not" feature, and alone made the evening worth while.

The final picture created the greatest interest, and was highly educational. It was the conception of and the methods in arriving at the present Airflow design.

Streamlining is the modern trend, and everywhere one could see functional design playing an important role. The car of the future is a problem, complex and varied, requiring the combined efforts of the engineer, chemist, designer, and one of them at least must possess great imagination.

SHEARER-BROUGHTON

A very pretty wedding was solemnized at the home of Mr. and Mrs. T. G. Broughton on Wednesday, August 15, when their daughter, Sarah Alice Muriel, was united in marriage to Mr. Harry Owen Shearer, son of Mr. and Mrs. Arthur A. Shearer, of Chapman Camp, B.C.

The couple stood under an arch of green foliage and natural flowers, and the bride, who was given away by her father, looked charming in a dress of white silk net over silk crepe, with a white veil arranged very becomingly in cap effect, and carried a bouquet of white carnations. She was attended by her sister, Mrs. H. English, as matron of honor, and Mr. English attended the groom. Miss Luella Braggencate, niece of the bride, was flower girl, carrying a basket of sweet peas. Only immediate relatives of the bride were present. A delightful luncheon was served at a long table, decorated with vases of beautiful flowers and centred with a lovely three-tier wedding cake. Mr. T. Broughton, father of the bride, proposed a toast to the bride and groom. Misses Islay and Ida Broughton, sisters of the bride, assisted in serving. In the evening a dance was given at the Broughton school, which was filled to the doors with friends of Mr. and Mrs. Shearer, extending their congratulations and wishing them many happy years of married life.

Mr. and Mrs. Shearer will make their home on the groom's farm, southeast of Corangon—Coronation Review.

BLAIRMORE PUBLIC LIBRARY

The Library hours are Tuesdays, Thursdays and Saturdays from 7 to 9 p.m. The fees are \$1.00 for residents and \$2.00 for non-residents per year. Non-resident students attending the Blairmore high school admitted under resident membership fee of \$1.00 per year.

DEATH OF MRS. ERNEST HINDS

Word was received last week end of the death at Fernside, Washington, of Mrs. Hinds, beloved wife of Ernest Hinds and former resident of Blairmore.

Mrs. Hinds had been in ill health for a considerable time, and the end was not unexpected. Mrs. Hinds left here a number of years ago with her husband and children, to take up residence on a farm in the Washington state, where they have resided since. Prior to leaving Blairmore, Mr. Hinds was engaged in the draying business, selling out his interest to David Oliver.

Mr. Hinds was a member of the I.O.O.F., having joined the Order in the States prior to coming to Canada. The late Mrs. Hinds was a member of Crowview Rebekah Lodge here, being one of the charter members, and for a time holding official position in the lodge.

Mrs. Hinds is survived by her husband and three children, Lucy (now Mrs. Dr. Hunter; George, with the U.S. navy, and Delma at home.

SALVATIONIST ESCAPES ARREST AT THREE HILLS BY KNOWING ORDINANCE

Apprehended by the Three Hills police last Sunday afternoon for conducting an open-air service at that town, Captain C. Watt, of the local Salvation Army Corps, proved a bit too smart for the officer of the law.

The policeman informed Capt. Watt that he could not hold such services on the streets of Three Hills, but the Salvationist informed his assailant that an ordinance issued by the king of Great Britain, permitted the holding of open-air meetings on any street corner. The Three Hills mayor and council were called out to settle the argument and finally they were convinced that Capt. Watt was right and permitted him to go free. Capt. Watt had taken members of his junior band to Three Hills and was just about at the end of his service when the police intervened.—Drumheller Mail.

Deceased is survived by a brother, John, in Michel; a sister, Mrs. T. D. Stark, in Vancouver, two daughters, Mrs. W. D. Burgess, of Trail, and Mrs. W. Barclay, at Fernie; and one son, James, a barrister, living at Natal.—Fernie Free Press.

FESTIVAL EXECUTIVE MEETS

An executive meeting of the Crows' Nest Pass Musical Festival was held at the Greenhill hotel on Monday evening at 8.30. A great deal of business preparatory to the forthcoming festival was transacted.

There will be no season tickets issued this year.

The supervisor of music for the Pass public schools was present, and has plans well under way for entering school choruses from every school in the Pass.

The recommendations from the finance committee, which met Friday evening, were read and approved.

The increased territory has added a great deal to the interest in competitions, and entries are expected from the new territory east to Medicine Hat.

The C.P.R. has offered special rates for the week through the festival district.

A new class for rural school choruses was added to the syllabus; also a senior boys' solo class, to give the young lads whose voices are changing a chance to enter.

The meeting was marked by great enthusiasm and interest, and the committee feels that the festival on October 25-27 promises to be outstanding in number of entries.

The date for the general meeting was set for the evening of Monday next, October the 1st, at 8.30 in the Greenhill hotel.

DEATH OF MRS. ERNEST HINDS

Word was received last week end of the death at Fernside, Washington, of Mrs. Hinds, beloved wife of Ernest Hinds and former resident of Blairmore.

Mrs. Hinds had been in ill health for a considerable time, and the end was not unexpected. Mrs. Hinds left here a number of years ago with her husband and children, to take up residence on a farm in the Washington state, where they have resided since. Prior to leaving Blairmore, Mr. Hinds was engaged in the draying business, selling out his interest to David Oliver.

Mr. Hinds was a member of the I.O.O.F., having joined the Order in the States prior to coming to Canada. The late Mrs. Hinds was a member of Crowview Rebekah Lodge here, being one of the charter members, and for a time holding official position in the lodge.

BLAIRMORE UNITED CHURCH

Rev. Albert E. Larke, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, September 30th, the minister in charge.

2 p.m.—JUNIOR SCHOOL.

7.30 p.m.—PUBLIC WORSHIP.

The attention of the congregation of Central United church is called to the announcement that commencing next Sunday, Sept. 30th, the service of Public Worship will be at 7.30 p.m. instead of at 11 a.m. The junior Sunday school meets at 2 o'clock instead of at 10 a.m. The senior Sunday School will resume its sessions on Sunday, Oct. 7th, at 11 a.m. With the holiday season now passed, it is hoped that everyone will get back to regular church and Sunday school attendance.

A. E. LARKE, Minister.

UNITED CHURCH GROUPS ORGANIZE

All groups connected with the Central United church, (including those interested in a Young People's Society) are asked to meet in the auditorium of the church on Monday evening next, at 8 o'clock, to discuss plans and organization for 1934-35. A representative from the church board will negotiate arrangements for the use of the gymnasium for the winter months.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, R.A., Pastor

Services Sunday, September 30th: Sunday School at 10 a.m. in the church.

Holy Communion at 11 a.m.

Supt. W. H. Ruthven and assistant superintendent G. M. Cording, of Lethbridge, left this week for Winnipeg, where they will attend a banquet being tendered Vice-President D. C. Coleman, for many years in charge of western lines of the C.P.R., and recently named as vice-president in charge of operation of the whole system, succeeding the late Grant Hall.

Fred Holmes, teller of the local branch of the Royal Bank of Canada, has been transferred to head office in Calgary, and has already assumed his new post. He is succeeded here by Mr. Carver, of Picardville.

Capt. Watt was formerly stationed in the Crows' Nest Pass, and the above should be very interesting reading.

Fred Holmes, teller of the local branch of the Royal Bank of Canada, has been transferred to head office in Calgary, and has already assumed his new post. He is succeeded here by Mr. Carver, of Picardville.

Capt. Watt was formerly stationed in the Crows' Nest Pass, and the above should be very interesting reading.

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to take part in this sport. The yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday life and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the inculcation and development of those traits of character which recognize and insist upon fair play, respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to skill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly trained experts "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" may be a native son or even a resident of the home city, but imported men from anywhere simply because they have the knack to excel in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized to the nth degree to make money for the owners of the franchise and their high-salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magazines with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money grabbing instinct of men. Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the admiration and ultimate enrolment of youth from all over the country. It is no longer sport in its true sense, but a business proposition with such institutions.

With but few exceptions, people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place, and a big place, in the physical, mental and moral development of youth. But it is being perverted to gross material ends, with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is time a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Use Ultra-Violet Rays

Planes Equipped For Toning Up Dials On Instrument Board

Ultra-violet rays have become standard equipment on aeroplanes engaged in night flying.

Pilots found that the radium dials of the instruments in the cockpit became dull unless radio-activity in them was stimulated occasionally. So ultra-violet rays boxes were installed.

The boxes, not much larger than safety match holders, are fastened to the steering post across in the line of vision. Since ultra-violet rays are invisible there is no reflection against the windshield when the pilots use them, ed.

Monkeys Have Gone Nazi

Animals In London Zoo Give Salute To Visitors

A special cable from London to the New York Herald Tribune says the monkeys of Regent Park zoo have gone Nazi.

In a recent week, it appears, a German visitor to London taught Jimmie, one of the zoo's chimpanzees, to give the Nazi salute in return for bananas. Other Simians promptly imitated him, and to-day the entire monkey horde enthusiastically giving the "Heil Hitler" with up-raised paws whenever visitors arrived.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 30 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. E. Moore Co., Ltd., Toronto, Ont.

Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the doughty West of England colliers who conducted him round the mine. Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole."

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay in the prince's duchy estate.

The prince lent a sympathetic ear to the colliers' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The men set to work. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paying for itself. Fifty men are in full-time employment; one hundred and thirty-five tons of household coal are raised every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal welcome from the black-faced colliers.

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared, his hands black from the low corridors where he had bent almost double.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong.

Read what he says: "I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working now—12 hours a day sometimes. Kruschen Salts have done it."—G. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channels. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid, but of other body poisons which undermine the health.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-talored young man in brown soft hat and brown shoes was exploring an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage—or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; decrease of 70,000 acres, or 2.3 per cent. in barley; and a decrease in flaxseed of 37,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent., and rye also increased by 149,300 acres, or 28.7 per cent.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada, Hon. George H. Sedgewick, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

A tax of about 10 cents a gallon is levied on gasoline in England.

W. N. U. 2065

Air Survey Reveals Ruins

Ancient Earthworks Sunken For Centuries Were Invisible From Ground

A moundbuilders' ceremonial chapel and an ancient roadway, approximately two and one-half miles long, were discovered for the first time near Newark, Ohio following completion of an aerial survey by Captain A. W. Stevens, intrepid army photographer and participant in the recent ill-fated attempt to invade the strathospere.

The discovery was made by Dr. Henry C. Shetrone, archaeologist and director of the Ohio State Museum while examining air photographs taken by Capt. Stevens at museum offices in Columbus, Ohio.

Invisible from the ground, these once mighty ancient earthworks, believed constructed by Hopewell Indians, have lain sunken for centuries unnoticed by residents of this vicinity.

The roadway, which is 150 feet wide, is of perfect-geometric proportions and indicates that people of the Hopewell era had some knowledge of that most scientific science, museum officials believe.

A keyhole-shaped figure on the air photo, the chapel, which lies at the road's southwest termination, is approximately 200 feet in diameter at its circular part and is believed to have been a ceremonial oracle of the Hopewell tribes.

Located between two perfectly proportioned circular Indian mounds southwest of the city, the territory in which the new discoveries were made has long been a mecca for archaeologists and tourists.

Tunnels and elaborate underground burial rooms similar to those found in the world famous Ogden Mounds near Lewistown, Ill., also products of the Hopewell culture, might be found as a result of the new discovery Shetrone believes.

First research of the Newark Indian burial grounds was made in 1848 by Squire and Davis, early archaeologists who explored Ohio and the Midwest.

Although they indicated the beginning of the roadway in maps filed with the Smithsonian Institute in Washington, no further trace of the earthworks had been discovered until the expedition by Captain Stevens, museum officials say.

When Duties Are Divided

Work Is Very Seldom Done As It Should Be

Affairs at the British ministry of finance, where the wheels never move clean because, as someone has just discovered, the ministry of finance is responsible for the inside and the ministry of fine arts for the outside, and the two ministries never arrange to clean both sides at once, had an almost exact parallel nearer home in early Victorian days. When the prince consort began inquiring into arrangements at Buckingham Palace, which he found far from satisfactory, he was informed that the lord chamberlain had charge of all the interior rooms except the kitchens and pantries, which were under the lord steward, while the exterior came under the office of wools and forests, and that they likewise failed to synchronize in cleaning the windows. On demanding why there was never a fire in the dining room, he was told "the lord chamberlain lays the fire, and the lord steward lights it." As the underlings of those two great officers were in disagreement the queen was left to dine in the cold.—Manchester Guardian.

Need Coin-Container

Philatelists Sending Money Through Mail Use Variety Of "Stickum"

A crew of 15 postal clerks at Yellowstone Park, Wyoming, which handled the 90,000 requests for first day covers on the new Yellowstone stamp issued recently, wonder why someone has not invented a special coin-container for philatelists.

Collectors sending in five, ten, twenty-five, and fifty-cent pieces used every conceivable method in making the cash enclosures with the envelopes which they wanted to carry the new stamp as well as the cancellation mark from the Yellowstone post-office on the first-day covers. Tar, adhesive tape, molasses, wax, honey, chewing gum and syrup were among the varieties of "stickum" employed.

The clerks all exhibited sore thumbs and fingers from digging for the well-protected cash.

Delaware, with only three, has the smallest number of counties of any state in the United States.

If some men would work more and hope less they would get along better.

Cook's Home Rebuilt

In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 233 lorries, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as one wit remarked. Stones for the walls flagstones for the floor, joists rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be much use for hammering in, but interesting as showing the type used.

The ivy plants will not be required in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of diseases. In exchange for the cottage, Cook's birthplace, Great Ayton, Yorkshire, is to possess a stone obelisk modelled on the monument commemorating his discovery at Cape Everard.

Fall rye in Canada, as at August 10, 1934, shows a yield of 5,239,000 bushels from 587,000 acres compared with 3,454,000 bushels from 434,900 acres in 1933.

Of 35,500 insured workers in Luton, England, only 700 are out of work.

Lignite Coal

Development Of Coal Field In Saskatchewan Carried On Successfully

Development of high moisture lignite deposits in southern Saskatchewan, which are located a considerable distance to the east of their fuel sources in Western Canada, has been carried on successfully throughout the depression years. R. L. Sutherland, consulting engineer for the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years when the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel.

Roman coins were minted in the temple of Juno.

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, sides them over Change of Life... makes life seem worth living again.

SUSPECT IN THE LINDBERGH CASE IS APPREHENDED

New York. — Police Commissioner John R. O'Sullivan issued the following statement in connection with the Lindbergh case:

"The taking into custody of Bruno Richard Hauptmann marks an important and closely co-ordinating effort on the part of the New York police department, the Jersey troopers and the department of justice to bring to a solution of the Lindbergh kidnapping and with the facts at hand we are satisfied that the first and most important stage of the police work has been accomplished.

"The story as related by the detectives who have been engaged on the case for more than two and a half years might best be told in chronological fashion.

"Within two days after the payment of the ransom money in St. Raymond's cemetery, a \$20 gold certificate was discovered in the East River Savings Bank, on Amsterdam avenue and 96th street.

"Subsequently, one of the ransom bills, bearing an automobile license number, was discovered in the Corn Exchange Bank at Park avenue and 125th street. From there the bill was traced to a gas station in the vicinity of the bank.

"The operator of the gas station described the customer who passed the \$20 gold certificate in an almost identical fashion as the one described by the Fordham shoe store proprietor.

"Customer who passed the \$20 gold certificate in an almost identical fashion as the one described by the Fordham shoe store proprietor.

"Securing the name and address of the owner of the automobile bearing the license number appearing on the bill, the investigators kept the premises under surveillance. Because of the importance of the case and the danger in the least possible slip-up, the men acted with caution and at 9 o'clock Tuesday, Sept. 18, Bruno Richard Hauptmann was seen to leave his residence in the automobile bearing the license which appeared on the bill, and started toward Yorkville, with the detectives following.

"When his car reached Tremont and Park avenue, the detectives halted Hauptmann's car, directed him to get out and searching him, found another \$20 gold certificate identified as part of the Lindbergh ransom.

"He was immediately taken back to his house and while questioned there admitted passing the \$10 and \$20 gold certificates found by the police. He denied, however all knowledge of the Lindbergh ransom money.

"Meanwhile, a search of the place was instituted and a pair of shoes located and identified by the Fordham shoe store proprietor was found.

"Today, in continuation of the search of the house, Detectives John Murphy, Frank Dunn and James Petrosini, of the New York police department; Sergeant Wallace, of the New Jersey State Police, and Special Agent Turo of the department of justice found, after a diligent search of the entire premises, a \$137.50 hidden under the floor of the garage and in the sack of the door.

"From the many conflicting stories Hauptmann has told detectives, we learned that he is 35 years old, born in Saxony, Germany, and after serving in the German army, stowed away on the steamship Washington, arriving in the United States at New York in 1923.

"He explains the presence of the money as a result of careful savings, and the gold certificates as foresight, with word of the supposed infant shortly after President Roosevelt took office."

Ship Reaches Craig Harbor

Ottawa.—Canada's 1934 expedition to the posts in the eastern Arctic has reached its most northerly objective, Craig Harbor, on the south coast of Ellesmere Island. Wireless dispatches received in the department of the interior report the S.S. Nasopie, carrying the Dominion government party, had reached the far northern post.

Going To Ottawa

Guelph, Ont.—Robert J. Donnell, young Guelph carlineer, has been appointed Dominion carlineer at Ottawa for a year during the absence of Percival Price, it was announced here. Mr. Price, winner of the Pulitzer prize in 1934, is leaving for Switzerland for one year's tuition.

Meisner Surrenders

Claims He Had Nothing To Do With Labatt Case

Detroit. — Asserting he did not have the first thing to do with this kidnapping, David Meisner, one of two men sought by Canadian and Detroit authorities in connection with the kidnapping a month ago of John Labatt, Ontario brewer, surrendered to detectives here.

Meisner said he could produce "all the witnesses in the world—even policemen," to prove he was in Cincinnati at the time of the kidnapping for \$150,000 which, so far as known, has not been paid to date.

He surrendered to Inspector John Hoffman, of the special investigation squad, after making an appointment. Hoffman said Meisner surrendered without any conditions.

The other man sought is Albert Peggam.

Communists Shout Insults At Queen Wilhelmina

Three Members Of Parliament Arrested At The Hague

The Hague, Netherlands.—Three Communist members of parliament who shouted insults after Queen Wilhelmina had finished her speech from the throne were arrested and jailed as an infuriated mob tried to get at them.

Police, fearing an outbreak of violence as the temper of the throng about the parliament building grew in hostility, led the men to prison by a secret route.

It was the first time in the history of the Netherlands that members of parliament were arrested in the course of a session. They were released later.

Circus Lion Caused Panic

Shot By Guards After Escape From Cage During Parade

Richmond, Va.—Breaking open a cage during a circus parade a lion dragged down a horse pulling one of the wagons and then ran at liberty down North boulevard while crowds of spectators fled in panic.

Circus guards shortly after shot the animal to death.

The beast ran several hundred yards down the street after Patrolman John Robert Paul had first five times at him as he sank his fangs into the horse's neck, taking refuge in the Hankins-Johnson sheet metal works. A circus guard while crowds of spectators fled in panic.

Circus guards shortly after shot the animal to death.

Want Financial Aid

Canadian Fisheries Ask Government Grant For Advertising Purposes

Montreal.—J. C. Eckman, Vancouver, and John Dybbaven, Prince Rupert, B.C., were named vice-presidents of the Canadian Fisheries Association at the 19th annual convention here. Captain Frederick W. Wallace, Montreal, was elected president.

A resolution was adopted urging the Dominion government to vote \$100,000 at the next session of parliament to pay the cost for newspaper advertising for the development of Canada's home market for fish. Date of Canada's annual fish week was fixed for October 29 to November 3.

Criticism Of Lottery

New York.—A broadside of criticism was directed at the city's proposals to raise relief funds through new taxes and a municipal lottery. Threat of a legal fight against the lottery was voiced. Mayor P. H. Laguardia admitted a lottery stood about one chance in 10 of being declared legal.

Eight Doukhobors Fined

Nelson, B.C.—Eight of eleven Doukhobors arrested for failing to fight forest fires were sentenced to a fine of \$25 or to serve one month's imprisonment. Three who produced doctor's certificates were dismissed. They appeared before Stipendiary Magistrate John Cartmel.

C.P.R. Appointment

Montreal.—Announcement of the appointment of N. M. McMillan as assistant to the vice-president and general manager of the Canadian Pacific Railway was made by H. J. Humphrey, vice-president and general manager.

Ceylon Welcomes Prince

Columbo, Ceylon.—Remarkable scenes of enthusiasm greeted the arrival of the Duke of Gloucester, third son of His Majesty, as he arrived aboard the cruiser Sussex en route to the Victoria state centenary celebrations in Australia.

War Is Denounced

Church Of England Opposes Strife As Means Of Settling Disputes

Montreal.—With almost unanimous accord, members of the general synod of the Church of England in Canada, by resolution, denounced war as a means of settling disputes between nations.

The resolution, moved by Rev. Canon W. H. Davidson, Montreal, and seconded by Magistrate J. E. Jones, Toronto, was to accept the principle laid down by the Lambeth conference of the Church of England. On the principle that Canada, should be prepared, one dissenting voice was raised, however, by E. E. Richards, Victoria.

"We must have the best instruments of war available," he said. "There is something worse than war—that is national dishonor." He was met by loud cries of "No," when he declared: "I say that the movers of this resolution are responsible for these men's deaths."

Ven. Archbishop F. G. Scott, of Quebec, famous war-patriot, rose to reply to Mr. Richards.

"The last thing General Sir Arthur Currie did," Archbishop Scott reminded the synod, "was to send a message to the university veterans in Toronto imploring them to start a movement to say that war is a futile test and not a test of the manhood of the world. That came as the general's last order from his death bed."

INSURANCE PLAN IN CANADA FOR THE UNEMPLOYED

Montreal.—Premier R. B. Bennett is preparing to launch an unemployment insurance plan in Canada upon his return from Europe, Ward C. Pitfield announced at the annual general meeting of the Montreal Conservative Association, Inc., at which he was elected president.

Mr. Pitfield, a prominent business man and a leader in the Montreal Conservative field, stated: "The prime minister has under way an unemployment insurance scheme, worked out on an actuarial basis, which I think is the first plan I have ever seen to combat unemployment."

"If the provinces agree, this plan will go into effect," Mr. Pitfield went on. "If they don't I don't see how it possibly can. The provinces have power over civil rights. They have, for instance, power over mortgages. I don't see why we can't reduce interest on mortgages from seven to six and eventually to five per cent. The only reason why we cannot do it is that each province has the right to govern its own mortgage legislation."

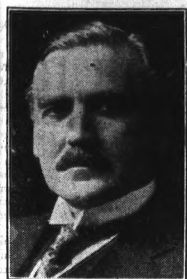

British Films

Large Sums Being Spent To Produce Better Pictures

London.—Opening of the newly enlarged Twickenham stadium will mark the beginning of a serious effort to produce greater British pictures, it was said here.

Julius Hagen spent \$2,000,000 to equip the Twickenham studios—already one of the largest in England—with modern devices, including underwater film apparatus. Six major films are on the program of the company Hagen stated, and \$5,000,000 will probably be spent in the first year of work.

MAY BE CHAIRMAN

It is understood that Sir Thomas White will be the chairman of the Royal Commission on Maritime Rights which has been appointed by the Dominion Government to determine the amount of subsidy which the Maritime Provinces should receive from the Dominion Treasury.

Takes Heavy Toll

Chinese Refugees Tell Of Lives Lost In Flood

Taokow, China.—An unending stream of bedraggled refugees from the region flooded by the Yellow river, their homes and livelihood destroyed, has poured into Taokow.

Government officials were considering a drastic proposal to transfer many of the refugees from the river valley to unsettled territories in Suiyuan province for rehabilitation.

Their crops destroyed and not knowing how to do the refugees wandering aimlessly, tell stories of acute suffering and vast loss of life in the flooded regions of southern Hopei and northern Honan provinces.

It was reported thousands, clustered together like frightened sheep, still occupy high spots in the Yellow river valley. Some still live in tree tops. Rescue work is proceeding slowly. The walled city of Changyuan has become an island, swirling flood water surrounding it.

Creamery Survey In Alberta

For Purpose Of Determining Cost Of Manufacturing Butter

Edmonton.—Beginning in Calgary and in Edmonton, a creamery survey has been launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the Dominion department of agriculture.

The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta and also of the cost of trucking or otherwise delivering cream supplies.

Returns Home Via Canada

Vancouver.—Miss Sheila MacDonald, daughter of Premier Ramsay MacDonald, who left London, Sept. 1, for Melbourne via the Suez Canal, to attend the Melbourne and Victoria state centenary, will return home to England by way of Canada, according to advices received by the Canadian Pacific Steamship Company here.

No Lives Lost In Fire

Nome, Alaska.—It has been found that the two Eskimos that were reported to have lost their lives in the \$3,000,000 fire of Monday are safe. This means that no lives were lost in the fire.

HAVANA RIOT LINK IN SHIP FIRES?

Havana police have launched an investigation to determine whether a riot of dock workers at the Cuban capital as the liner, Morro Castle, was about to leave on her tragic voyage, may have some connection with the disastrous fire aboard the ship. This photo shows an aftermath of the riot, a young girl, injured as she stood watching the rioting, being lifted into an ambulance.

Morro Castle Quiz

Startling Information Is Gleaned From Investigation

New York.—If obeyed, the last order from the bridge to the engine room of the Morro Castle would have left the flaming Ward liner circling about the ocean, a whirl of death and fire, evidence at the United States department of commerce inquiry shows.

The engine crew, however, disobeyed the order and put the engines into neutral.

This testimony was given by an 18-year-old Massachusetts Institute of Technology student, William Wesley Tripp, who was on the tragic voyage from Havana as a cadet engineer.

Details of the death of Captain Robert R. Willmott—who suffered an acute attack of angina pectoris and died only several hours before fire broke out on his liner—were given by Howard Hansen, the fourth officer, who testified he saw no marks of violence on the body.

Turners have been persistent that the master met foul play. The few charred bones found in the cabin where his body was cremated in the holocaust are now being examined for any evidence of poison.

Against Works Program

Calgary Wants To Spend Federal Grant In Own Way

Calgary.—By a polling of more than five to one, Calgary's property owners turned down a public works program involving expenditure of \$180,000 granted by the Dominion government for that purpose alone.

The plebiscite, in which only one-fifth of the registered voters cast their ballots, coincided with the city's determination to seek leave from the Dominion government to spend the apportionment on civic finance other than public works. Mayor Andrew Little, visiting Edmonton to enlist the backing of the Alberta government in such an arrangement.

The citizens voted 2,839 against and 555 for repairs to the horse show building at the exhibition grounds totalling \$15,000; 2,967 against and 395 for an assembly hall and gymnasium at Western Canada high school to cost \$95,000, and 2,516 against, 782 for a public swimming pool estimated at \$70,000.

DISCLOSE PLOT TO OVERTHROW SPANISH GOVT

Madrid.—The government was confident it had disclosed a plot of enormous proportions to overthrow the Spanish republic and establish a "proletarian state" by means of a revolution more bloody than the recent abortive uprising in Austria.

Wholesale murder of public officials, terrorism throughout the country, capture of the government arms manufacturing plants at Oviedo and Trubia and co-operation of Leftist elements of the air force and army had been planned, according to information the government claimed to have obtained.

Premier Ricardo Samper conferred with President Aloisio Zamora at his home and an announcement afterward said he was sure the leading plotters, socialists and extremists, would be apprehended promptly.

Plans said to have been disclosed included a revolutionary general strike throughout Spain with a carefully-schemed campaign of sabotage, and other terrorism.

Squads of machine gunners were to have been designated for transporting in trucks to villages and towns, arousing the proletarian masses and massacring the opposition, cutting communications, taking over banks, and assuming complete power.

While civil guards continued searching homes of known extremist leaders for weapons, the premier gave the president the details of the reported conspiracy to set up a "proletarian state" and assured Zamora that the government was prepared for any emergency. All government buildings were guarded.

A truckload of arms captured and destroyed found in the possession of Francisco Ordonez, athletic coach at Madrid University, arrested on the university athletic field, gave away the plot, authorities said, and created widespread alarm in government circles.

In the truck seized were 34 cases of machine gun bullets, 60 cases of rifle shells, 300 rifle clips, 34 machine gun belts, five liquid flame machines, and three 14-millimetre guns capable of piercing armor plate.

DANGER OF WAR IN THE FAR EAST IS LESSENER

Geneva.—Busy with efforts to end war in South America, delegates to the League of Nations heard that the danger of war in the Far East has lessened.

A day of debate as to the best way of halting the conflict in the Chaco Boreal was lightened by the assertion of Russian spokesmen, made privately, that relations between Japan and Russia have improved.

The Russian sources also stated their belief that both Japan and Germany, recent withdrawals from the league were lightened by the assertion of Russian spokesmen, made privately, that relations between Japan and Russia have improved.

Geneva developments of the past few days, headed by the Soviet's admission to the League, have created the following impressions among delegates, surveys indicated:

1. Both Japan and Germany are doing some hard thinking as to the advisability of returning to the league, their train of thought started by Russia's entry.

2. A period of delicate negotiations with Japan to remove existing causes of friction will be necessary. Russian sources forecast, and other members of the League council fear that hostilities may break out before they are completed.

3. Leaders of the League look to the United States to help settle the Chaco conflict under the aegis of the League, believing that simultaneous peace efforts along other lines would only offer an excuse for prolongation of the war.

4. Efforts to form an agreement among the powers to protect Austria's independence by co-operative armed intervention thus far have not progressed notably, because Great Britain declines to participate and Yugoslavia balks Italian leadership in such an effort.

5. France and Russia have become "dancing partners" if not actual allies.

6. Maxim Litvinov, Soviet commissar for foreign affairs, and Louis Barthou, French foreign minister who staunchly defended Russia's League candidacy, continued to centre the interest of the curious here. Assaulted by newspaper headlines, Barthou took off his coat the better to sign.

Rush To Nome

Sending Supplies To Reach Fire Stricken City Before Freeze-Up. Nome, Alaska.—Another rush to Nome was in the making, but it will have little resemblance to the gold rush of 1898 and subsequent years.

This time it will be a rush of supplies and a battle of man against time and temperature.

Hoping to rebuild the fire-stricken city in part at least before the Arctic ice shuts out all shipping a few weeks hence, the citizenry laid plans for quick transportation of lumber and other construction materials as well as food and medical supplies.

The Alaska Steamship Company cut its freight rates in half for building materials and relief supplies, leaving Seattle aboard the steamer Dellwood.

New Bank Governor

Quebec.—"I was very pleased to note the choice of G. F. Towers as governor of the central bank of Canada," commented Sir Edward R. Peacock, Canadian-born director of the Bank of England, who arrived here. Sir Edward is in Canada to visit his mother in Toronto.

Runeless Silk Stocking

Halifax.—A. G. Sandoz, technician at Dalhousie University here, claims he has found what every girl is looking for—a runeless silk stocking. He has evolved a solution which, when applied to any textile in the form of wash or rinse, is supposed to make the fibres stronger and more elastic.

New Bank Notes Smaller

Ottawa.—Canada's new bank notes, under the Bank of Canada, will be issued in about four months. It is reported they will be five inches long and 2½ inches wide. The present notes are 7½ by 3½ inches and United States notes are 6½ by 2½ inches.

Lodges Disbanded

Berlin.—Wilhelm Frick, minister of the interior, issued a decree dissolving 13 Masonic lodges. No reason was given for the action except the statement that it was done under the Jan. 8 law giving the government the right to disband lodges.

IS COAL COMING BACK?

These are revolutionary times, and the revolutions of the times are not all political. The application of oil to the business of transportation and turning the wheels in factories began a revolution in the fuel business and inflicted a serious blow, but not a knock-out blow, to the business of the coal mine operator and the occupation of the coal miner. Oil aspired to the title of champion. In the first round of the fight for the championship it had the defender of coal groggy; but the coal champion is not out. In the parlance of the ring, he is struggling, to remain his feet, and may be "coming back".

In a recent copy of The Edinburgh Scotsman there are the words which must be of great interest to the coal miners of Great Britain, and should be of considerable interest to the coal miners of Alberta and British Columbia. It appears that research engineers have been searching and have found out that gas—which may not be coal but lives next door to it—may be applied quite as effectively and more economically to turning the wheels of industry as oil. There is no fuel oil in Great Britain, and none has yet been discovered in British Columbia, and thereby hangs the tale of interest in the discovery of the research engineers.

The following is part of the article printed in The Scotsman:

"Recent developments in the use of gas were discussed by Councillor W. Muter in the course of a review of the gas industry at the weekly luncheon of the Edinburgh Rotary Club in the North British Station Hotel. Gas as a fuel for motor transport was being extensively used by manufacturers, said Councillor Muter, for running in their engines in the test bench. Formerly development had been retarded by the fact that any type of cylinder suitable for carrying gas in a compressed form was so heavy that the weight of the vehicle was materially increased. Recent research, however, had resulted in the production of cylinders weighing only a fraction of the former containers. They were capable of containing gas compressed to a pressure of 3,000 pounds. The use of these cylinders and the running of motor vehicles on gas had been authorized by the ministry of transport, and in many towns experimental buses were running. A recent trial run in which a 4-ton load of coal was carried a distance of 670 miles required only 74,000 cubic feet of gas and 27 gallons of low grade oil, also produced at the gas works, and running costs worked out at less than half what would be incurred by a petrol-driven vehicle over a similar distance. The cost of running on gas would be equivalent of petrol at 25 cents per gallon, but apart from this gas had other benefits including easier starting, better acceleration, and the reduction to a minimum of obnoxious exhaust gases.

If the present series of experiments in the use of gas in motor vehicles were brought to a successful conclusion, the basic industries of the country would benefit enormously. If the 10,000 organized omnibuses in the country were converted to take compressed gas and run 20,000 miles each year at 40 cubic feet a mile, a new market would be created for 8,000,000 cubic feet of gas and for over half a million tons of British coal.

The present output of crude benzene from the gas and coke industries in this country, said Councillor Muter, approached 50,000,000 gallons. It was our duty to produce as much motor

fuel in this country as possible. Councillor Muter referred to the employment created in the coal mining industry through the use of gas. The Gas Department of Edinburgh, using sufficient coal to employ 500 miners annually.—Ex.

THE HISTORIC CUP

The America's Cup—that famous old "mug" in the words of Sir Thomas Lipton—is not a cup at all, and any one trying to drink champagne or anything else out of it would be disappointed.

It is really a vessel resembling a pitcher or ewer and is open at both ends. It was made in 1851 by Messrs. R. and S. Gerard, of London, upon the order of the Royal Yacht Squadron, and it still bears the makers' stamp. It is 27 inches high, 36 inches in circumference and 24 inches on the base.

At the conclusion of the race around the Isle of Wight, when the schooner America captured the cup, it is reported that Queen Victoria asked who was second and received the reply: "There is no second."

As far as the cup is concerned, it is literally true that there was no second, for there is no mention of the Aurora, which finished second in the inscription recording the race.

The cup was designed and paid for by British yachtmen, and has remained in America, without a break, for 83 years. The pewter mug is

A FURTHER STEP
on the Road to Recovery

A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programme—and of the 1934 Loan as part of it—cannot be over emphasized. It is important from three aspects: 1—National Credit; 2—National Economy; 3—National Recovery. I shall deal with each of these in turn.

1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met fully and promptly as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining our credit.

By this programme Canada has already refunded £138,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3 1/2% and in New York, obtained a one-year Loan of \$30,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its face price. The twelve-year 4 1/2% Bonds of the 1933 Refunding Loan, issued at 93 1/2%, are now selling at 124 1/2% and approximately 3 1/2%.

2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$7,000,000 per annum, and completion of the 1934 Loan will provide a further saving of over \$5,000,000 per annum.

The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every tax-payer. This saving has much more than offset the interest charges on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burden which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an improvement so marked and so consistently sustained that we need no longer doubt its reality.

The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, carloadings, electric power production, employment and prices. Here is the record in a nutshell:

	PERCENTAGE INCREASE	
	During Year*	Since Low Point of Depression February 1933
Physical volume of business.....	11.8%	42.8%
Industrial Production.....	15.7%	56.9%
Carloadings.....	19.3%	29.4%
Electric Power Production.....	12.4%	32.7%
Employment.....	14.7%	17.1%
Wholesale Prices.....	4.0%	13.7%
Farm Products Prices.....	7.7%	43.3%

*In the case of carloadings, employment and prices, the latest figures available are those for August; in other cases, those for July.

*In the case of carloadings, employment and prices, the latest figures available are for August; in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products in value approximately \$99,000,000, or 32.7% over the same period last year. The corresponding increase for imports has been slightly under \$93,000,000, or 38.2%.

A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the simplest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

P. B. Bennett
PRIME MINISTER OF CANADA

DOMINION OF CANADA 1934 REFUNDING LOAN

The only way some men can make a mark in the world is by leaving a burning cigarette on someone's piano.

The \$50,000,000 stock offered by the Central Bank of Canada was oversubscribed in less than five days.

TRUE BLUES AND REDS

A gentleman named DuPont, whose family multiplied their millions many times by carrying on the patriotic work of supplying the world's armies during the Great War, with the means of blowing each other to pieces, states that the members of the committee of the U.S. Senate, which is investigating munitioners' profits are "reds who would disrupt the United States". From which we may perhaps judge that the DuPonts and the Zaharoffs and the Thyssens are the True Blues—United Farmer.

A strike in the Michel coal field has been avoided, John Stokeluk and Harvey Murphy, of the Mine Workers' Union of Canada, advising against this action when the matter of the laying off of 36 men from the One Seam mine was discussed on Friday evening last. The committee named to interview the mine management reported that the company refused to acknowledge the men as employees and declined to give them a share of the work. It was pointed out to the management by the committee that the men were sacrificing a shift or more in a period, but the management remained firm. Application was sent immediately to the government for relief for the idle men. Later three more men were laid off from the same mine, swelling the number unemployed to 39. The union leaders spoke against a strike and this advice was endorsed by the meeting.

Albertans got to know Dr. Geo. A. Dickson very well during his pastorate of Knox church, Calgary, for he was often on the radio and lectured and preached outside of Calgary. In every day category he is termed a popular preacher, the sort who draws crowds. When the subjects of his sermons are announced they have unusual titles, and the curious are out to hear what he says, become fascinated with his preaching, and continue going. All this as a preliminary. Metropolitan United church, once known as the Cathedral of Methodism, is one of the most imposing in Toronto. It is located down town, far away from the residential section, where most of its members live, and in recent years it has been found difficult to keep up its congregation. This year it called the Calgary diocese to its pastorate and though he has only been occupying the pulpit since August, Hon. N. W. Rowell, a prominent layman of Metropolitan, reports that congregations are growing so rapidly that chairs will soon have to be placed in the aisles to accommodate the crowds.—Lethbridge Herald.

HILLCREST HAPPENINGS

Mrs. D. Grant motored to California with her nephew, Mr. A. McLean, last week. Mrs. Grant is visiting at the home of her son John in Los Angeles.

The Hillcrest mine has been closed during the week, due to alterations being made at the tipple.

J. P. Norton, who has been a patient in the local hospital for about a week, is progressing favorably.

The stork visited the home of Mr. and Mrs. John Sabo last week, leaving them a baby girl.

The Saturday night dance was quite a success. The Arcadians were in attendance.

Gwyn Richards left Sunday for Edmonton, where he will resume his studies at the University of Alberta.

Mr. and Mrs. W. Stevenson returned Saturday from a visit to Spokane.

J. Graham, of Lethbridge is a visitor in town.

Mr. and Mrs. G. E. Cruickshank, accompanied by Miss Cruickshank and Jean, motored to Spokane on Tuesday.

The sale of home cooking and tea, under auspices of the Eastern Star ladies, was a great success.

A LOT OF WORDS

Do you know how many words in the English language mean "crowd"? Well, here are a few of them: a crowd of ships is termed a fleet, a fleet of sheep is called a flock, a flock of girls is called a bevy, a bevy of wolves is called a pack, a pack of wolves is called a gang, a gang of angels is called a host, a host of porpoises is called a shoal, a shoal of buffalo is called a herd, a herd of children is called a troop, a troop of partridges is called a covey, a covey of stars is called a galaxy, a galaxy of ruffians is called a horde, a horde of rubbish is called a heap, a heap of oxen is called a drove, a drove of hoodlums is called a mob, a mob of whales is called a school, a school of worshippers is called a congregation, a congregation of engineers is called a corps, a corps of robbers is called a band, a band of bees is called a swarm, a swarm of people is called a crowd.—Ex.

BELLEVUE HAPPENINGS

Mrs. Beal, senior, left Sunday last on an extended visit with her sons and daughters at Glace Bay N.S. This is her first trip back since coming west years ago.

The whist drive and dance held on Friday, sponsored by the Rebekahs, was largely attended. Prizes were won by the following: Mrs. G. B. Rose, ladies' first; Mrs. W. Alexander and Miss Jean Cruickshank cutting for second, the latter winning; William Goodwin, gent's first; Mrs. H. Meade, second (playing as a gent should). After cards, a dainty luncheon was served, after which dancing was enjoyed to music by the Band's orchestra.

Mr. and Mrs. J. Curry, senior, left Saturday for Chicago, where they will visit Mr. Curry's brother.

Mr. and Mrs. Butler, of Vancouver, arrived here over the week end to spend several weeks, guests of Mr. and Mrs. W. Alexander.

The tea and sale of home cooking, held in the church on Saturday last by the Ladies' Aid, was very successful.

James Cardie was a Calgary visitor last week, returning home on Sunday.

The local branch of the Mine Workers' Union of Canada have purchased the building recently vacated by D. Sorrentino, and are renovating it for a clubroom.

Thomas Bradley, of Winnipeg, arrived Monday to visit his wife, who has been here with her parents for several weeks.

Mrs. M. D. McEachern entertained a few ladies at her home on Tuesday afternoon.

Mr. and Mrs. C. W. Johnson and Mr. R. T. Johnson returned Friday from a week spent in Calgary.

G. McIntyre, who has been holidaying here for the past two weeks, left Monday for Lethbridge.

Mrs. Benly arrived Tuesday night to visit friends here.

Mrs. A. Watson and family arrived Tuesday evening from Calgary, to join Mr. Watson, who has been here for some time.

The adjourned inquest into the death of James Pelle was held on Tuesday evening in the I.O.O.F. hall, when a verdict of accidental death was returned.

The Bellevue and District Horticultural Society held a meeting on Friday evening for the distribution of prizes for the recent exhibition.

THE OPPORTUNITY IS THERE

We often hear much about "home town talent." The source of a town's soundest and healthiest growth is the intelligence and interests of its own citizens. A town, or city, is just like a business. The best businesses find their executives right in their own ranks. They make sales managers out of delivery boys, superintendents out of apprentices, and presidents and directors out of salesmen. No town or city is so small that it does not contain within its own corporate limits the ability necessary for vigorous growth. Unfortunately, this ability does not always express itself without encouragement. A city or town run by successful business men who are good judges of men and who like to help young men, that town or city will grow. Let the town's capital and the town's vision be controlled by half a dozen tight and ugly old crabs who have quit living, and are rusty, and the town will soon be ready for a receivership. Clean young men, fresh and eager for conquest, will be rudely and gruffly put down when they venture to step forward. With no opportunities open in their own town and no encouragement to them, they seek new parts, and attach themselves to communities where brains and energy are welcome.—Stavely Advertiser.

Employer: "Personal appearance is a helpful factor in business success."
Employee: "Yes, and business success is a helpful factor in personal appearance."

BY-LAW PASSED TO STOP ALL NOISES ON COAL CITY STREETS

The Drumheller City Council have decided that there are too many miscellaneous noises in the Coal City and at their Monday night meeting passed a by-law, which prohibits the use of radios or gramophones for the advertising of businesses. This means that the small boy shouting all about the dance at such and such a hall, or the big hall game, or hockey match, will be a thing of the past, unless the Chief of Police, John Duncan, issues a special permit, and the radio horns over the store door pealing out "When You and I were young Maggie" and other painful ditties will be taboo. The latest act of the City parliament also has a clause in it, that before any show or circus can stage a parade, they must get the permission of the Chief of Police and advise him of the particular kind of noises they will be making when they are passing through the streets of the Coal City. The circus lion bellow forget his roar, when visiting here, or he will get the show pinched.

Just what effect the new by-law will have on the world baseball series remains to be seen, as this comes over the store door horns and the automobile radios, as cars are parked on the street.—Drumheller Review.

HITLER'S ACCOMPLISHMENTS

The Hitlerite revolution has transformed the diplomatic chess-board of the world. It brought France and Italy together, in association with Britain, in deciding, as major powers, to recommend the entrance of the Soviet Union into the League of Nations and the granting to the Union of a permanent seat on the council of the League. It has even made Italy and France for the time being cordial friends. It has converted every foreign friend of Germany who fought in her behalf against the iniquities of the Treaty of Versailles, into a foe, not of Germany, but of Germany's strangely barbarous new Government. It has left Germany for the time being without a friend among the Governments of Europe, except that of Poland which hopes for conquest, it has gained Japan as a potential ally of the Nazi government in the Far East.

It has revived the League of Nations by creating fear of German policies and increased American good will toward the League. It has frightened the world capitalist interests which saw in Fascism their greatest hope, and now fear that it may prove their greatest liability because Hitler has "filled the beans."—United Farmer.

JUST TRY IT

Did you ever try phoning a Chinese laundry? If you did, you'll remember the conversation went something like this:

"Hello, hello, Hop Lee Laundry?"

"Watchawantee?"

"This is Mr. Carrigan speaking. Where's my laundry?"

"Calligan?"

"No! I won't call again and I want my laundry and I want it d—fast."

"No catchee, watchawantee?"

"I want my shirt and my collar—your dumb cluck."

"You gotta tickee?"

"Yes, I gotta tickee."

"Bringee tickee getee laundlee."

"No, no, you always deliver my laundry. I'm Mr. Carrigan, 4374 Metrol Street, and I want my shirts and collars."

"What laundlee you callee?"

"I called Hop Lee."

"Solly ahong num—tuh Hop See."

"CRASH"

Joan: "I am going to do my bit. Dad, I'm getting a dressmaker to teach me how to cut out dresses."

Dad: "I don't want you to go so far as that; but I think you might cut out cigarettes and ten-dollar hats."

WORLD HAPPENINGS BRIEFLY TOLD

Traffic earnings of the Canadian Pacific Railway Company for the week ended Sept. 14 totalled \$2,942,000, as compared with \$2,454,000 in the corresponding period last year, an increase of \$488,000.

Jeffrey Arnott, assistant purchasing agent of the Canadian Pacific Railway, has been promoted to the post of assistant purchasing agent with headquarters at Vancouver, B. W. Roberts, general purchasing agent, Montreal, announced.

Canadian farm products exported to the United States in August were valued at \$1,366,000, an increase of more than \$500,000 compared with the corresponding month last year when they amounted to \$833,000, the Dominion bureau of statistics reported.

The cost of living in England increased by one per cent. during August, the Labor Ministry Gazette stated. Taking July, 1914, as the average, the cost of living index was 143 per cent. on September 1 compared with 142 on August 1. The index stood at 141 in September, 1913.

Full freedom for civil servants to participate in politics, even to the extent of being a candidate in the federal, provincial or municipal arenas, through leave of absence without pay, will be sought during the coming session of parliament by the Amalgamated Civil Servants of Canada.

Grave fears as to the survival of the French-Canadian race as a distinct entity on Canadian soil are felt by Mayor Camille Houde, of Montreal. Speaking at a ceremony to commemorate the arrival in Canada of Jacques Cartier, Mayor Houde questioned the likelihood of the race's survival.

The weekly illustrated paper, "Canada," published in London for the past 27 years, is being merged with another weekly, the "Canadian Gazette." The editor and founder of the former publication, Walter LeRoy, closes 37 years of prominent association with Canadian news work in London.

Minister of Finance E. N. Rhodes declined to say whether the United States would follow the lead of the United States and nationalize silver. An assurance was sought by two Montreal silver exchange officials, but the finance minister said he could not be expected to make any definite statement on a government policy of such importance.

WHAT DOES YOUR HANDWRITING SHOW?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

The increased interest in Grapho-Analysis, the science of character detection from handwriting, has brought in its train not only a host of converts, but the inevitable sceptic.

One of the most frequent objections is posed by those who ask "How can handwriting show one's character, when we are taught how to write from the same copybook in school?"

The answer to this objection only proves how, strongly handwriting does show character. Because if you will study the writing of a single class of students who have learned writing from the same copybook, a few years afterwards, you will not find two who write alike.

Each one writes differently—a different slant, a different pressure, and differing conformations of letters. This shows that, as one grows, one's character changes or strengthens, and one's handwriting changes too.

And, whilst I am discussing objections, I would like to stress that it is not possible to take a person's age or sex from handwriting. Here and there, a trained grapho-analyst will be able to hazard a guess. There is no scientific foundation for it, however, and consequently, no reputable grapho-analyst will attempt it.

I have seen women's writing that looked masculine, and, conversely I have examined the writing of men that looked for all the world like that of a woman. Then again some young people write a mature hand, and on the other hand, I have seen the writing of a man of 50 which seemed to be that of a youth in his teens. We can only get from handwriting what is in it.

There is increasing evidence that certain ailments can be discerned from handwriting. People suffering from heart trouble reflect this condition in their writing.

But grapho-analysis has not yet attained the point where it is possible to analyse ailments from handwriting with entirely scientific accuracy.

These are factors that time and continued research will attain, but character analysis from handwriting is an accomplished fact. And it is also true that vocational guidance can be given by trained grapho-analysts.

If you want to discover your own characteristics and traits, as revealed by your handwriting, take advantage of the offer made at the foot of this article.

D.N.—You are ruled by your heart—Impulsive; emotional appeals will always draw you; sympathy and tears are inclined to get hysterical. There is evidence of good powers of concentration. You are really interested in anything. You find no difficulty in concentrating all your powers on it. You like to move around; to change environment. You are not content to remain passive in a routine way.

F.B.—You have considerable depth of feeling and a desire to get on in the world. There is a sense of balance displayed. You do not talk too much. You are inclined to be clanish; you do not make friends indiscriminately. Mechanical or engineering work is indicated.

These are, of course, merely brief extracts from analyses.

Would you like to know what your writing tells? And that of your friends? You will be amazed at the revelation disclosed. Send a letter in your normal writing, and state birthdate in each case. Enclose with 10c (for each separate specimen) and 3c stamped addressed envelope. Replies will be mailed as soon as possible, but please allow at least two weeks. Address: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg News-Paper Union, 175 McDermot Ave., E., Winnipeg, Man.

Recipes For This Week

(By Betty Barclay)

BAKED CORN AND TOMATOES

2 cups cooked corn
2 cups tomatoes
1 teaspoon salt
Pepper
1 teaspoon sugar
1 cup fresh bread crumbs
3 tablespoons butter

Mix seasonings with the corn and tomatoes and pour all into a greased baking dish. Spread the crumbs over the top, dot them with the butter and bake in a moderate oven for one-half hour. This is a satisfactory way of utilizing left over corn or tomatoes.

BAKED PRUNES

Cover 1 pound of prunes with cold water and let stand for four hours. Drain prunes and reserve the liquor; add $\frac{1}{4}$ cup sugar to the liquor and boil until the sugar is dissolved, skimming if necessary. Place the drained prunes in a covered casserole, cover with hot liquor and bake in moderate oven (325 degrees F.) 40 minutes.

It appears that a saxophone belonging to a well-known jazz player was lost recently. We understand that, despite frantic efforts by his family and the neighbors, it was found.

Dodges High Taxes

Woman Of 90 To Marry Young Man
So State Will Not Get Her Money

Life to Antonia Moreira of Lisbon, Portugal, has consisted of one tax collector after another and now at the ripe old age of 90 she is going to strike back. She's going to marry a man of 24.

Court permission has been given for the marriage. Senora Moreira said she would do very shortly and that "it would be a sin if I died and all my belongings should pass over to the state's treasury, which did nothing all through my life but collect taxes."

In marrying a young man, she was sure that her possessions would mean a good chance in life for him, who, strong and young, might then be happier in life, despite the high taxes.

To Safeguard Pedestrians

Beacons To Be Erected In London
Streets For This Proposal

"Bellah beacon" will be erected for protection of London pedestrians, another feature of the war on motor accidents. They set their name from Leslie Hore-Belisha, minister of transport, who presided at a conference when it was decided to introduce them.

These are posts seven feet high with a yellow-painted glass globe, unlighted, at the top. They will be put at the crossing-places for pedestrians. In the dark they will reflect headlights a quarter of a mile away.

Restrainted Phrase

The Winnipeg Free Press says: "Sir Ronald Lindsay on his return to Washington gave an interview to the press in which he disclosed unparalleled enthusiasm for a Britisher—on the conditions in the light little island. His exuberant phrase was that 'Britain is getting on after a fashion.'"

The deepest safe diving limit for any submarine yet constructed is 450 feet.

SUNDAY SCHOOL LESSON SEPTEMBER 30

REVIEW: GOD IN HEBREW HISTORY

Golden text: "Thy kingdom is an everlasting kingdom." Psalm 145:13.
Devotional reading: Hebrews 11:32-40.

A Review By Means Of Allusions
To what does each allusion below refer?

"And the might of the Gentile, unglorified by the sword, Hath melted like snow in the glance of the Lord.—Byron.

Up, Christians, leave your caves and do—P. B. Meyer.

Let a man ask himself whether he is seeking to please God by doing justly, loving mercy, and walking humbly before him; whether he is on the side of God and of the things which are pleasing in God's sight.—Brevint P. Brown.

"With the cords of a man Jesus is drawing men; in the bands of love he is binding the world together."

When the brook dries up, the word of the Lord often comes to the men. When he withdraws his gifts it is that we may see himself.—J. Stuart Holden.

"There is much splendid work of this kind done by the Friends. But it is likely to be missed by those who despair of the Kingdom of God. There are a host who have not bowed the knees to Baal."

What asks our Father of his children, save
A reasonable service of good deeds,
Pure living, tenderness to human needs,
Reverence and trust, and prayer for light to see
The Master's footprints in our daily ways?—Whittier.

I see the oil of thy Word will never leave increasing whilst any bring an empty barrel.—Thomas Fuller.

"Let justice, unimpeded by avarice of selfishness or cruelty, roll down as waters."

Flying At High Altitudes

Wiley Post Sees Fast Time Made In
Upper Stratos In Near Future

Wiley Post, round-the-world flyer whose most recent interest has been an experiment with an aeroplane that would make commercial flying practicable at altitudes of around 40,000 feet, arrived in Vancouver recently.

Since he completed his solo flight around the world in the record time of seven days, 16 hours and 40 minutes, Post has been working at development of a high altitude ship. He said he believes his machine is capable of sustained flight at around 40,000 feet and will make 350 miles per hour at that altitude. He is certain high altitude flying will be commercially general before long.

For flights of 300 miles it will be economically better to rise at least to 20,000 feet, Post said, and for longer flights, machines will travel from 40,000 to 50,000 feet above the earth.

Estimates set the cost of the proposed inter-American highway from Alaska to Argentina at \$105,000,000.

Polished mahogany is likely to fade in strong sunlight.

Little Journeys In Science

GOLD FROM THE SEA

(By Gordon H. Guest, M.A.)

Science has shown that there is gold in the sea, but the authorities on this subject are in dispute as to the quantity. Figures given indicate that there are about 700 ounces of the precious metal for each of the two billion inhabitants of the earth, which would amount to \$24,500 per person if gold is valued at \$35 per ounce.

Is it any wonder then, that ever since chemistry became an exact science, plans have been proposed to mine this wealth from the sea? One famous scientist lured by the idea was the late Dr. Fritz Haber, who was awarded the Nobel prize for his method of producing ammonia gas from the air. He found such small amounts in sea water that he concluded the idea was impractical. In his opinion there is more gold in the living organisms of the sea than there is in the sea water.

Recent developments seem to indicate that the chemist of the next decade may be able to extract gold from sea water commercially. This is based upon the fact that a plant has been built in the United States for the extraction of bromine from the ocean.

Bromine is used in the production of ethyl gasoline and hence is in great demand. A few years ago chemists turned to sea water for bromine, even though it contained only seventy parts of bromine in a million of water. Very large quantities of water must be treated—2,000 gallons to obtain a pound of bromine.

It is easy to see why scientists talk so confidently of securing gold from sea water. Bromine is only worth twenty cents a pound whereas gold is valued at about \$35 an ounce. Thus, in spite of the fact that there is much less gold than bromine in sea water, science is hopeful of mining gold on a commercial scale from the ocean. It has been estimated that the gold content of sea water is about \$25,000,000 a cubic mile.

Skating Rink On Glacier
James Simpson, guide, naturalist and artist, has scraped smooth the surface of a glacier lying between two mountains near Banff, Alberta, to make a summer skating rink for his husky daughters, Mary and Margaret. He said skating on glaciers will be common in a few years.

"How do you make your living?" "Selling things to men who go fishing."

"That's interesting. How is the fisherman's equipment business?" "I don't know. You see, I run a fish market."

The number of sheep in New Zealand as shown by the returns on April 30, 1914 was 28,550,770 an increase of 800,000 compared with the corresponding date in 1913.

Women want men to be sturdy cake-and spruce.

The SNAPSHOT GUILD

School Ahead! Pictures, Too!

Excitement is part of the picture at any football game. It's easily won the missing of one play to get an over-the-shoulder shot like this!

ABOUT this time of year, school is in everybody's mind; not only students and teachers, but parents, aunts, and uncles.

And if there ever was a snapshotter's paradise, it's school. It may be a one-room school or it may be a great university. Wherever, whatever it may be, it's crammed with unbeatable picture possibilities.

Yet we might as well face the silly fact of the matter—few snapshotters make the most of school's snapshotting opportunities.

Perhaps they are dazzled by the very wealth of the material at hand. More likely, they assume that somebody else is going to take the pictures. And that's a fatal mistake. For nobody else can see things as you see them. And it's what you see that means most to you—and to the folks at home, now or years from now.

The question, then, is how to make the most of school's picture possibilities. A little planning will do the trick.

First, about the right camera for school. Any camera will do, providing it is clean and in good order and uses a size of film that is easily available anywhere. If you have a fast lens and a fast shutter, you'll have an advantage in taking shots at sporting events, but such a camera is not at all essential. With a little care you can make even the simplest box camera turn out entirely satisfactory pictures.

Then, how can snapshotting be planned? All of it, of course, cannot be planned, but many of the most important shots can be. Why not work out a scenario, Hollywood fashion?

A really good collection of school pictures is hard to find, as any school year-book editor will tell you. Yet there's nothing much easier to take, and few snapshots increase in value, year after year, as surely as those taken at school.

JOHN VAN GUILDER

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

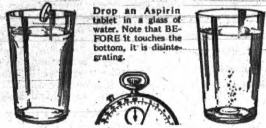

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin. Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Really important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart. Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get 10 of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH

An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses when you swallow Aspirin? It starts to dissolve in a few minutes after taking.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

SYNOPSIS

"You've fallen here to a half-sharp in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

(Now Go On With The Story)

CHAPTER I—Continued

"What seems to be the trouble?" Keene's tone was friendly. "Ben, he said that as far as he can see there are two reasons. Carr is slightly old-fashioned, and the Broken Spur is next to 'em."

"Well, what of it? These days some one's got to be next door."

"Huh. You're damned innocent for the man I know you to be. I suppose you never heard of rustling?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got only about four or five men permanently on his payroll. That means that poverty keeps him from building up a bunch of waddies he could count on to charge hell with a cup of water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. You see, Dustin and Goddard have been tryin', by a lawsuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens? Old man Carr, crippled, is being robbed dead, dumb and blind to make him sell his place."

"But he can only sell his share. Half of the place is mine."

"Well then," Stone handed himself erect in his chair. "It looks to me as if one Gerald Keene, before long, will find himself partner to two crooks. If old man Carr is right. Don't you see? Old man Carr will have to sell his half of the Hour-glass to these Dustin and Goddard to stand square with the world."

"Does your friend Lyon say these men Dustin and Goddard are two crooks?"

"He didn't have to say so. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook. Why?"

"Well," I told old man Burwell I was going to run down to the Hour-

glass and have a look at the place. If I go as the half-owner I'll learn exactly nothin' if there's any crooked work goin' on. I'm thinkin' it'll be best for me to go down there with a letter of introduction from Gerald Keene, the half-owner of the Hour-glass, to old man Carr. To get me a job down there and see for myself what's goin' on."

"Huh. Gerald Keene'll learn nothin' but good on Gerald Keene's ranch," said Stone grimly.

"That's so. I can't go to the Broken Spur because if Dustin and Goddard are really crooked, they'll not be here to go down there with a letter of introduction from Gerald Keene, the half-owner of the Hour-glass, to old man Carr. To get me a job down there and see for myself what's goin' on."

"Huh. Gerald Keene'll learn nothin' but good on Gerald Keene's ranch," said Stone grimly.

Dr. Wernert's Powder For FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Scrub on Dr. Wernert's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Get anything you want to hold place firmly in place—they positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy substance. Keeps mouth healthy, breath pleasant. Prescribed by most of the world's dentists. The cost is only a few cents. Ask any druggist.

W. N. U. 2045

Hour-glass or the Broken Spur, your wire for one Gerald Keene. That's me! I'll help you chase the hen off the nest."

"Wait. . . . Keene came back from the closet with a bottle and glasses. 'Here's the health of Keene and Stone. . . . I'll wire if I need you.'"

"And when I hear," said Duro Stone, left behind, "I'll sure come a-runnin'."

"You may need 'em," said Keene soberly. "I hope not but I'm afraid." "All right, Old Timer. To the health of the new Duro Stone."

CHAPTER II

"There he comes now! That's old Dad Kane as sure as shootin' . . ."

Sam Dustin, half-owner of the Broken Spur ranch, jerked a finger to the west and Spike Goddard, his partner, rose slowly and squinted in to the dust-baz of the range.

"You're a damned fool ever to have grubstaked that old fool Dad Kane," he said explosively. "It's all your doin', too. Three hundred dollars plumb thrown away."

His words carried a sting. They were meant to do just that. Everything that Spike Goddard said or did carried a sting. His red face; his cold blue eyes, his wire-act reddish beard all bespoke competitiveness and Dustin felt that sting. He knew that silence under the whip-lash of his tongue would annoy Spike more than any speech.

Dustin and Goddard had owned the Broken Spur for several years and all Crevasse County wondered how they made it pay. That they did make money was clear but none knew how they did it. Old Sam Peters, the deceptible old cashier at the only bank in Seco, could have told them but there were good reasons why Peters should tell nothing that affected Sam Dustin.

"If you'd told me three years ago that you were aimin' to grubstake old Shanny Skin Kane," said Goddard, "I'd have told you it was the ne' of a damn fool."

"I know. An' then you stopped me from takin' up the Bar Circle range lease for grass," snapped Dustin. "That cost us over ten thousand. All because . . ."

This time Spike flushed. A man does not care to be reminded of his timorous moments that cost him money. He stood by his partner, scowling off into the sunset. Joint owners of the Broken Spur, they were as different as black is from red. Sam Dustin's tall little figure, his dark, handsome face, his flawless teeth made a perfect foil for his partner who was, as Jameson, Editor of the Seco Courier said: "As red as a fox and twice as shifty. I wouldn't trust the pair any further'n I'd trust a coyote in a henyard."

The negro cook came out and pounded the supper summons on a big iron triangle that hung on a China-berry tree and the men trooped from the bunk-house to supper but the two partners gave no sign. They continued to stare across the corral at a great red dust-cloud that moved slowly along the distant wire-fence. Under that dust-cloud dim shadows resolved themselves into three packed burros followed by a sloouching figure that prodded the rear-most burro with a short rod. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed.

THE RHYMING OPTIMIST

By Aline Michaelis

DAWN

Dawn, coming up with its splendor Blazoned in gold and in blue; Dawn, with its message of courage, Old as creation, yet new!

Tasks that are waiting; the toiler, Dawn, that is waiting the old. These are the gifts dawn is bringing Now, as its banners unfold.

Labor and laughter and loving, Planning and pleasure and pain, Ever with dawn life begins, Lifting its ringing refrain.

Dawn, with its promise of power Setting the restless heart free, Brimming men's thoughts with fresh Hinting of triumphs to be.

Answer to prayers made in anguish, Symbol of sorrow withdrawn, After the night and its doubting, After the dark, comes the dawn!

Canadian-grown root seed compares favourably with the best imported seed in its ability to produce profitable crops.

Some 25 million bushels of corn are used each year to make corn syrup.

"Did you know what you'll do," quoth Stone between grins. "But if you did out what the trouble was at the

Now..

AIR-CELL BRINGS AN ENTIRELY NEW THRILL IN RADIO

"I heard the big ball game this afternoon, Jim—came in clear. 'No, we haven't' electric wiring in our house, but we don't mind losing every bit as good as my cousin's electric set down in the city."

"I used to get into town every time the storage battery ran down. This new radio uses an Air-Cell battery that never needs recharging. It's a real saving home, though, because our Air-Cell set brings in programs we never heard clearly before."

"That new Air-Cell radio is a wonderful convenience. Our old storage battery was always giving trouble, and half the time we couldn't get the music loud enough. This new set has such an even current that you can hear perfectly all the time."

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone hitherto only heard in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household, and so does away entirely with the annoyance, expense and loss of time due to frequent recharging.

Used in conjunction with EVEREADY Icarus "B" Batteries, Air-Cell radios, when the standard of set manufacturers, will perform with all the simplicity and reliability of any electric set.

Going Back To Spitzbergen

Elderly Swedish Hunter Likes Life Beyond Polar Circle

Making one of his rare visits to his home country, Andreas Qvarnstrom, who is 70 years old and has spent the last 25 years in the polar regions as fur hunter and coal mine employee, has been telling the newspaper in Stockholm something of his experiences.

In the last few years he has lived in the summer months as watchman at the coal mines in Spitzbergen, carrying on his trapping in the winter. He tells of long winter months spent in the frozen wastes without human companionship, of polar bears and arctic foxes which have fallen on his rifle or been trapped by him. He estimates that he has secured the pelts of at least 200 bears.

Qvarnstrom has been shipwrecked in the polar sea. He has had to swim in icy water when his boat capsized, and when he reached firm ice, his clothes froze so quickly as pulled himself out of the water that he had to break the frozen cloth to be able to move his limbs.

In spite of his age and the hardships he has endured, Andreas is in the best of health. He still feels the call of the wild and intends to return to his lone life in the inhospitable regions beyond the polar circle.

Preserving Indian Legends

Grandson Of Ojibway Chief Writing Stories He Has Heard

Indian legends are being saved for posterity by Robert Henderson, grandson of an Ojibway chief, who recently celebrated his 85th birthday at Selkirk, Manitoba.

Reaching the last stretch of his energetic life, Henderson has turned the knowledge he picked up to writing the stories told him by his elders. He was born at Fort Alexander, now Pine Falls, Man., Aug. 14, 1848. He learned the alphabet from a clergyman who spent a winter at the fort. Since then, in all his travels, he has been adding a little more each year to his knowledge.

Henderson is a veteran of the "Trail of '98" and has prospecting and trapping in many parts of the Dominion, Yukon and the United States.

A Necessary Journey

"We must go to Stratford," a tourist on a visit to England said to his wife.

"What's the use of that?" asked she. "We can buy Stratford post cards in London."

"My dear, one travels for something more than to send post cards! I want to write my name on Shakespeare's tomb!"

More rice is consumed throughout the world to-day than any other food product.

A sense of humor is a great help when one is without funds

Laws Of Physics

Intricate Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKessock at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan, two suspended leaden balls of equal weight. When one ball swinging slowly is struck by one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion, becomes almost motionless. "An authority on physics points out that if two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the major force. The majority carries."

An electric current always is passing from the atmosphere into the earth.

Tiny Fish Is Transparent

Species Called Gobys Is Found In Tropic Waters

To anglers accustomed to catching deep sea fish on a heavy line, the new fish which swim around in the zoological museum at Stanford University would hardly seem worth while, but to scientists is the discovery of a decade.

This tiny species, called a goby, and less than two thirds of an inch in length, was brought to the museum by Dr. Albert W. Herre, curator and scientist of international repute, on his return from a 40,000-mile trip in tropic waters.

The little transparent creature, unnamed as yet, is the smallest fish to have a whole backbone of its own. It is found off the Malay peninsula and is one of thousands of new specimens that clutter the museum.

"We caught them," he explained, "in rivers and lakes and the open sea from China to the Carolines, and from Yap to Cape Town."

Try Out New Regulations

Denver Doctors Will Not Quarantine Measles Or Mumps

The presence of mumps, measles and chicken pox will no longer be proclaimed by quarantine signs on Denver residences. The juvenile diseases—triple bugbear of neighborhood, ill children and businessmen—in the future will not keep members of the family indoors and visitors outside.

The quarantine sign has been dropped on advice of physicians who declare that the diseases, while infectious, can be transmitted only by direct contact. And, the physicians also believe, the acutely contagious stages have been passed when the symptoms definitely appear.

The city health board will give the new regulation a one year trial.

The largest gold mine in the United States is in South Dakota.

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 119:76.

Love divine has seen and counted Every tear it caused to fall; And the storm which Love appointed Was its choicest gift of all.

O that thou couldst dwell in the knowledge and sense of this, even the Lord beholds thy sufferings with an eye of pity, and is able not only to uphold thee under them, but also to do thee good by them. Therefore grieve not at thy lot, be not discontented, look not at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience, can lift up thy head over all, and can cause thy life to grow and be a gainer by all. If the Lord God help thee, according to thy condition of affliction and distress thou wilt have no cause to complain, but will bless His name.—I. Pennington.

Duchess Was Good Substitute

Takes Duke of York's Place And Digs Potatoes

When the Duke of York was unable to visit Sheffield, England, because of a poisoned thumb, the duchess took his place. At a group of allotments, where unemployed men had contributed a penny each to present the duke and duchess with garden implements, their leader said they had hoped the Duke of York would dig up some potatoes with the fork. "Well, I shall try to take his place," the duchess replied.

Unmindful of her high-heeled shoes and her white gloves, the duchess stepped into the potato patch and grasped the fork firmly. She picked up one of the potatoes, telling the men that she would give the fork to the duke herself.

A Big Change

Lord-Willington went from Croton to Dublin in a week. So much has air travel accomplished. When the first Viceroy, Canning, went to his duties in 1858 the trip took more than five weeks. Steamships were slow, and there being no Suez Canal the way was round the Cape.

The annual Thanksgiving dance, under auspices of the Columbus Club, will be held in the Columbus hall on the night of Monday, October the 8th.

Gertrude Atherton stated: "Communism reduced to its simplest form means autocratic power for a few and slavery for the millions."

Rev. Roy C. Taylor, of Coleman, was elected chairman of the Lethbridge Presbytery of the United church at the fall meeting held this week at Cardston.

Malcolm Bruce, prominent Communist, recently released from Kingston penitentiary, is billed to address a public meeting in the Columbus hall here on Saturday night.

A group of about thirty ladies paid a surprise visit to the newlyweds, Mr. and Mrs. F. Hottle, on Thursday night last. The host and hostess were the recipients of many beautiful gifts.

George Morris, an escaped convict from Fort Saskatchewan jail, has been arrested at Pontiac, Ill., and will be returned to Calgary for questioning in connection with the murder of Inspector J. Carruthers of the Calgary police.

Some of the shrubbery recently planted in the local Tim Buck boulevard proved a much desired delicacy for some of the 2000 or more sheep that were wending their way eastward through the snow on Sunday. Not satisfied with the exposed tips of the plants, they pulled out many of them roots and all.

Mrs. Daw: "I'm bothered with a little wart that I'd like to have removed."

Dr. Stewart: "The divorce lawyer is at the corner of Eighth Avenue and Main Street."

Blairmore Man (who had come to see the doctor to find out what was wrong with him): "Now, listen, doctor, I've had my teeth, tonsils and appendix out, my wife made me give up smoking five years ago and I've never played golf."

Doctor (growing): "Then, why the deuce are you coming to see me? The fellow you want to see is the undertaker. Five dollars for the advice."

Three degrees below zero on Tuesday morning gave us all a chill.

"Doc" Wainwright was a visitor from Calgary this week.

Frank Nemrava was a visitor to Blairmore from Canal Flats this week.

Percy Simpson, formerly with the Union Packing Company, is a drummer in town this week.

Rev. A. E. Larke attended the meetings of Lethbridge Presbytery at Cardston on Monday and Tuesday.

Fred Holmes, of the Royal Bank staff at Turner Valley, is home for a two weeks' holiday.—Bassano Mail.

The Salvation Army has resumed activities in the Pass, with Lieut. Carter stationed at Coleman.

Drumheller staged a two-day carnival this week to raise funds for the hockey club.

A dance is to be held at Burmis shortly, music, "Hollywood Jigs," to be supplied by Poor Charlie's whistle.

Mrs. Dina Dranchuk has been sentenced to hang for the murder of her husband near St. Paul, Alberta, on August 20th last.

The ladies of St. Luke's Guild are working on material for a bazaar, to be held early in December. Further announcements later.

The local Women of the Moose are holding a whist drive and dance in the Lodge hall tonight. Turkey and chicken constitute the prizes.

Cecil Johnson and Joe Morgan left last week for Edmonton, where they will attend University. Mr. R. Large has taken the place of Mr. Johnson in the drug store.

Very few of those who have earned their way to our jails and penitentiaries have very much kick to make against them. The whole trouble is that those who are kicking have been far too well treated.

A point of special interest to Canadians about the Endeavour, British challenger for the America's cup, is the material in her deck, which is constructed entirely from Canadian white pine. For many years this wood has been greatly favored by shipbuilders for fine construction.

The marriage of Rene, eldest daughter of Mr. and Mrs. Charles Bosetti, of Hillcrest, to Marco Perosa, of Cranbrook, took place at the Bellevue Catholic church on Saturday evening last, Rev. Father Dunbar, of Coleman, officiating. The young couple will take up residence at Cranbrook.

Jack: "I don't see your husband at the club of late, Mrs. Brown." Mrs. Brown: "No, he stays at home now and enjoys life in his own way as I want him to."

Counsel: "Answer me a plain question: Were you or were you not bitten on the premises?"

Witness: "Anatomy ain't my strong point, gov'nor, but I know I couldn't sit down for a week."

"Just why do you want a married man to work for you, rather than a bachelor?" asked the curious chap.

"Well," replied the boss, "the married men don't get so upset if I yell at them."

"And can you tell me what were his last words?" asked a reporter who was collecting material for the obituary notice of a local celebrity. "He had no last word," was the reply. "You had better just say 'His dear wife was with him to the end.'"

Thompson's grocereria opens today.

Mrs. D. Kemp, sr., left today on an extended visit to her daughter and son-in-law, Mr. and Mrs. J. Higgins, of Redding County, Boston, Mass.

Richard Hauptmann, of the Bronx, New York, has been arrested in connection with the kidnapping of Lindbergh's son two years ago. \$13,750 of the ransom money was recovered.

EYES EXAMINED at the Blairmore Pharmacy, Saturday afternoon, October 6th, E. J. ANDERSON, B.Sc., of Calgary, in attendance. Free demonstration of the new Amplified Acousticon Aid to Hearing.

Liberals won four out of five by-elections in Ontario on Monday, following which the Liberal leader, Rt. Hon. W. L. Mackenzie King demanded a Dominion election, claiming that the present administration had completely lost the confidence of the people.

We regret that an error should have been made in a correction line in an item in last week's issue, referring to cases against a number of ladies charged with vagrancy. The sentence reading "The fact was also disclosed that a resolution had been passed, etc.," should have read "The fact was also disclosed by the court that a resolution had been passed, etc." Also the line "inmates were to be posted, by the court," should have read: "Pictures of the inmates were to be posted, together with medical certificates, etc."
